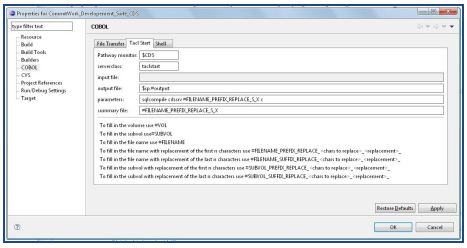
stay comfortable with Cobol !

CommitWork Developer Suite

Cobol Edition

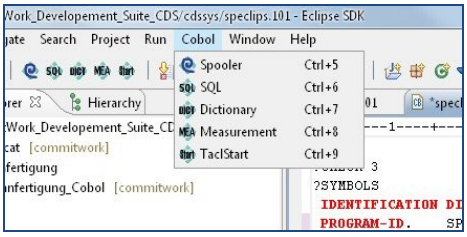
you are not travelling into the Java world right now, then stay comfortable.

Lay back and enjoy your well suited *Guardian* environment by working in a renewed *Eclipse* surface.



you can do this by using your well known

- ☑ project structures ($Volume.Subvolume)
- ☑ compile environment (Comp <Filename>)
- ☑ Obey files
- ☑ macros
- ☑ generators for DDL extracts



don't leave your new *Eclipse* environment for

- ☑ starting your Compiler
- ☑ accessing your Spooler
- ☑ accessing your Dictionary
- ☑ generating usefull SQL statements
- ☑ using Measure for sample programs

enhance your cosy atmosphere by

- ☑ using repositories for your team
- ☑ using Eclipse editors
